REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-6, 8-22, 37-40, the prior art fails to teach a method of switching an Ethernet packet, the method comprising: computing a plurality of tags for the Ethernet packet, each of said plurality of tags computed using two or more fields in said packet, wherein "said fields are selected from Ethernet and network headers in said packet and said plurality of tags corresponds to a plurality of flow detectors in a flow switch node," which is considered in combination with other limitations, as specified as, in the independent claim 1.

Regarding claims 23-36, the prior art fails to teach a method comprising: computing a tag for an Ethernet packet, said tag computed using at least two fields in said packet, wherein "said fields are selected from Ethernet and network headers in said packet and a length of said tag is determined by the probability of a hash code generator producing an identical hash code from different input packets; removing entries that have not been accessed for a

predetermined period from the table," which is considered in combination with other limitations, as specified as, in the independent claim 23.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
